

Walkden Software

altname.txt

The following is how to create a find & replace file called altname.txt that changes any Service name or Stagename to an alternative.

Create a textfile, call it altName.txt, save it in
c:\program files\walkden\Project Folder\sysfiles.
Project Folder is the name of your project folder

For any service names that you wish to alter, add a line as below:

Service 100=123 City Centre to Hall End

The Service 100 heading will be changed to
Service 123 City Centre to Hall End

For any stage names that you wish to alter, add a line as below:

Old Stage Name=New Stage Name of any length
Cntl Gdns Gnd Cnr Ter=Central Gardens Grand Corner Terrace

The Stage name on the left of the equals will be changed to
The text on the right of the equals '='

Dont have blank lines.

You can place as many lines of text as you wish.

The text to the left of the equals "=" must be identical to the text being replaced, although it is not case sensitive.
