## WayEdit

### Underscore

Underscore every 0,1,2,3 or 4 lines

or enter line no's to underscore specific lines.

This works with Underscore to create a grid within the fares.

### Append Services and Classes to a Printout

The current Service/Class will be the first in the list  
Enter any Service Number and Class to append it to the current Service  
(use the following format **Service:Class,Service:Class,Service:Class**)

The following methods can be mixed together  
09:CHILD RTN,12:ADULT RTN or 09:<0012>,12:<032A>

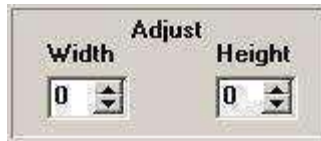

The Service/Class list will not change when ticked,  
useful in Batch Mode with Multi Service/Class printouts on single page.  
Right-click Previews the Selected Service/Class (Single Printout)

**Warning** : This section is intollerant of errors  
A visual check of all printouts must be carried out  
Minimal checking is carried out by WayEdit

# Walkden Software

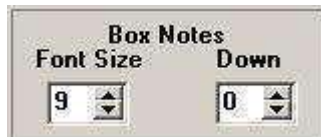

## WayEdit

Adjusts the height and width of the gap between each fare

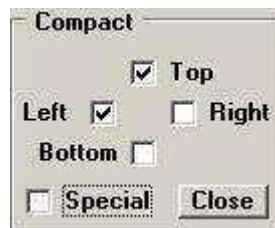

Adjusts the footnote position and size

Adjusts the box position and size

Opens the following options

Removes zero fares from the Top, Left, Right, or Bottom of a Fare-table, Special removes Columns of zero fares. (Only use if zero fares exist)

1, 2 or 3 page printout (if fare-table is large enough)

Split always cuts the final page into two sections

Offset : Offsets the page break
